## Precision Lubrication for Traveling Puller Saws There are two versions available for Aluminum Extruders:

Model 6000E1-1.5T-10-21-C-C24

The **6000E series** provides ultimate control with electronic injection rate and fixed injectors.

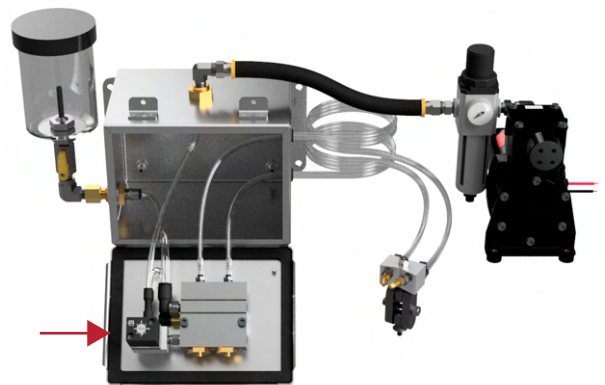

For more information about electronically controlled spray applicators, please see *AMCOL 6000E Precision Applicators - Technical Description*.

The **6000P series** is an air actuated system that controls the injection rate through a pneumatic pulse frequency generator.

For more information about pneumatically controlled spray applicators, please see *AMCOL 6000P Precision Applicators - Technical Description*.
