6000-ETC Controller for SMART 6000E Systems

## What is the ETC ?

**The 6000-ETC is an electronic controller with an on-board PLC built specifically to control the 6000E Precision Lubrication System. 6000-ETC gives you all of the control of electronic timing with no need for programming.**

**6000-ETC  
Controller**

- *Repeatable*
- *Measurable*
- *Easy to Adjust*
- *Prevents Over-Use*
- *Precision Control*

### Features include:

- **Fluid volume adjustment with the push of a button**
- **A screen display with injection frequency to make adjustments simple**
- **Manual Mode: Overrides machine signal for troubleshooting and set-up**
- **Eliminates pneumatic timers**
- **Optional Low fluid level indicator light**

**6000E SMART  
Applicator**

**Combine with a  
SMART 6000E for  
Ultimate Control**

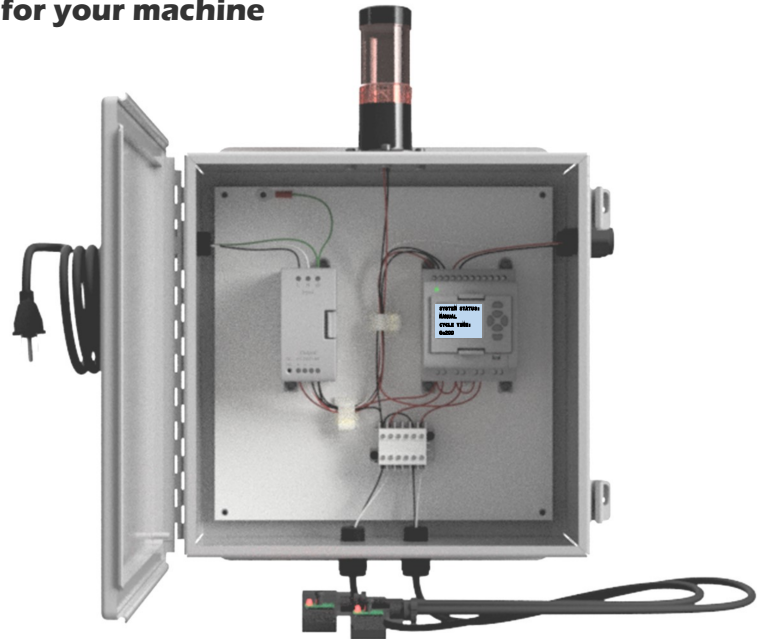

# AMCOL Corporation

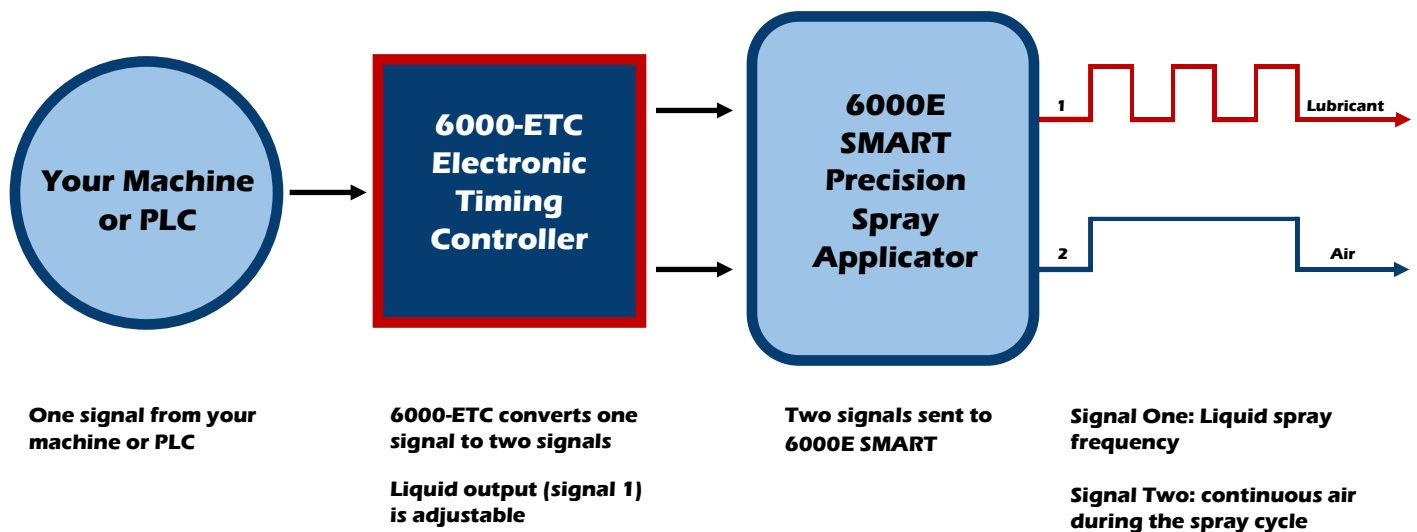

6000-ETC Controller for SMART 6000E Systems

## Why use the 6000-ETC and electronic timing?

- Eliminates overusing lubricant due to unknown system settings
- Better understand exact lubrication needs for your machine
- Works with no PLC or limited access to PLC
- Only requires one output from machine
- Compatible with older machines
- No need for PLC programmer
- Plug and play installation
- Adjustments are simple

## How it works:

**Proven technology, refined over decades.**
