1018 SURE CLEAN

Water Soluble Cleaner and Corrosion Preventative

PRODUCT DESCRIPTION

1018 SURE CLEAN is a water diluted cleaner and corrosion preventative. It will loosen remove surface particulate in circulating immersion and low pressure spray wash systems; apply heat to the cleaning solution for best results. The residue that remains after cleaning will coat and protect steel from rusting in storage and transit.

ADVANTAGES:

- Outstanding Corrosion Prevention
- Easily Removed with Alkaline Wash
- No Solvents – Water Based
- Residual Film Stays Soft and Oily
- May Be Spray Applied

COMMON APPLICATIONS:

- High Speed Tube Sawing Cells with Integrated Cleaning
- Manual and Automatic Immersion Part Washers

AMCOL Corporation

1018 SURE CLEAN

Water Soluble Cleaner and Corrosion Preventative

SUGGESTED USE AND CLEANING

1018 SURE CLEAN is typically diluted with 10 parts water to 1 part concentrate. It may be heated up to 160 deg F to enhance surface cleaning and accelerate the water evaporation after cleaning. Purified water (RO or DI) is generally recommended. Solids removed in cleaning should be filtered to 5 micron and tramps oils removed with belt or tube skimming.

1018 SURE CLEAN is removed with an alkaline detergent prior to painting or plating.

TYPICAL PHYSICAL AND CHEMICAL PROPERTIES

Physical State: Liquid at 25 deg C

Odor and Appearance: Amber liquid with a bland odor

Solubility (in water): Miscible (prior to evaporation)

Specific Gravity: 1.00 - 1.10

Viscosity: 1-25 centipoise at 25 deg C

pH: 9.5 - 9.9

Special Precautions: May cause skin and eye irratation.
